LOCAL SPRAY CHRYSANTHEMUM CATALOGUE

AVAILABILITY: LIMITED - Between Late April - Late May

BUNCH SIZE: 5 stems / bunch

VASE LIFE: 10 - 12 days

ORIGIN: Western Australia

COLOUR SUBSTITUTIONS:

Local spray chrysanthemums are available for a short window each year, typically from late April to late May, with their peak season aligning with Mother's Day. Due to natural growing conditions, slight variations in colour and shape can occur from season to season. Where substitutions are necessary, we will prioritise matching based on colour preference first. Please use this catalogue as a guide only, as availability may vary.
